«PLIM» REMOTE CONTROL 23110260

NOTA: The PLIM transmitter exclusively allows cloning procedure between transmitters; It is not possible to program PLIM as «Master» on the receiver

PROGRAMMING PROCEDURE:

1) First you have to delete the factory pre-set code by holding down the second and third buttons until the LED flashes, then release the third button and press it 3 times, **while keeping the second button still pressed.**

2) Now bring the back of the original remote control close (<10mm) to the back of the remote control to be cloned, press the button to be programmed on both remote controls and keep them pressed until the LED flashes constantly on the clone remote control.

Programming is complete.

Repeat the steps to program extra buttons

NOTE: In case of accidental deletion, to restore the last cloned code, hold down the first and the fourth buttons until the LED flashes;

The PLIM remote control allows you to clone the following SEARemote controls:

LADYBIRD COPY 433MHz

ROUND

SMART DUAL COPY
